

“The Commoner”

Two important issues that I need to bring to your attention.

The firstly work was due to start on the first of September, please see the attached schedule, but has been delayed due to bad weather earlier in the year but I am very concerned that many of the commoners and parishioners are totally unaware of the works that are proposed are imminent.

Secondly, the Commons advisory committee have approved the installation of new, replacement finger posts that mark various byways, footpaths etc. Please can you let me know as soon as possible as we have to complete the funding request by 16th September!

On another matter we are continuing to register the old trees on the Common and within the parish. Many are known but several are unrecorded many of which are on private land or have long been forgotten, please give me a call if you not an oak or beech for example that exceeds 3.0 m. This also includes other species for example birch that are over 1.0 m. I am please to say we have found ancient hollies and some birch with girths over 3.0 m.

Yours sincerely

Jason Allum
